

TECHNICAL DATE SHEET

PRODUCT DESCRIPTION

Subaxy Top Coat is a two component cured epoxy finish for use on steel and cement surfaces where chemical, oil and abrasion resistant coating is required. It is recommended for non-immersion services. If it is to be applied over steel, it has to be used in combination with the appropriate primers as recommended below.

INTENDED USE

Subaxy Top Coat is used as an interior top coat for pipelines, equipment, machinery and other steel structures in chemical factory, power plant and etc.

GENERAL PROPERTIES	Colour	: Colours as per colour cards. Special colours available upon request	
	Gloss Level	: High gloss	
	Volume Solids, %	: 59 ± 2 % (Mixed)	
	Specific Gravity	: 1.18 ± 0.1kg/l (Mixed) depending on colours	
	Flash point	: Base 24°C Hardener 43°C Mixed 24°C	
	VOC	: 390 g/l (mixed, by calculation)	

SURFACE PREPARATION

All surfaces should be clean, dry and free from contamination. The surface should be assessed and treated in accordance with ISO 8504. Oil or grease should be removed in accordance with SSPC-SP1 solvent cleaning.

Damaged Area

Damage area should be prepared with abrasive blast cleaning to Sa $2^{1/2}$ (ISO 8501-1:2007). When abrasive blasting is not possible, mechanical cleaning to St 3 (ISO 8501-1:2007) is acceptable. After the surface preparation, patch primer prior to the application of Subaxy Top Coat.

Subaxy Top Coat should always be applied over a recommended anticorrosive coating scheme for metal surface. The primer surface should be dry and free from oil and other contaminations. It must be applied within the overcoating intervals specified (refer to application section for details).

TECHNICAL DATE SHEET

Other Surfaces

The coating may be used on other substrates. Please contact your local Tsubasa Paint office for more information.

CONDITION DURING APPLICATION

Avoid paint application when the temperature is below 10°C or above 45°C and relative humidity is over 85%. The temperature of steel surface must be a minimum 3°C above dew point of surrounding air.

APPLICATION GUIDED	Mixing Ratio	: Base: hardener = 4 : 1 (by volume) Base and hardener should be mixed thoroughly before use.
	Pot Life	: 5hrs/ 25°C
	Theoretical Coverage	: 11.8 m²/liter at 50µm DFT
	Thinner	: Subaxy Thinner

APPLICATION METHOD Brush and roll is suitable for stripe coating and very small areas. For best result, use airless spray. Care must be taken to achieve the specified dry film thickness.

APPLICATION DETAILS	Airless Spray	: Tip Size Pressure at nozzle	: 0.015" – 0.023" : 140-170 kg/cm²
	Typical Thickness	: 50 - 80 μm, dry film 85 - 136 μm, wet film	
	Drying Time	: Substrate Temperature	:25°C 40°C
		Surface Dry	:2hrs 1hr
		Through Dry	:10hrs 5hrs
		Cured	:7days 3.5days
		Dry to recoat (min)	: 10hrs 5hrs
		Dry to recoat (max)	: None

The given data must be considered as guidelines only. The actual drying time/times before recoating may be shorter or longer, depending on film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc. A complete

TECHNICAL DATE SHEET

system can be described on a system sheet, where all parameters and special conditions could be included.

RECOMMENDED PAINTING SYSTEM

The following Primer are recommended for Subaxy Topcoat:

Primer

• Subaxy Primer

For the choice of coating system for different application, refer to the product brochure or contact Tsubasa Paint for professional recommendation..

PACKAGING	Unit	Base		Hardener	
		Vol	Container Size	Vol	Container Size
	4.5L	3.6L	5L	0.9L	1L
	18L	14.4L	20L	3.6L	5L

STORAGE	Shelf life	: Part A: 24 months (25°C)
		Part B: 24 months (25°C)

Subject to re-inspection thereafter. Higher temperature during storage may reduce the shelf life and may lead to gelling in the tin.

Store in tightly closed container in a dry, cool and well ventilated space, keep away from sources of heat and ignition.

HEALTH AND SAFETY

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not breathe or inhale mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushes with water and medical attention sought immediately.

For detailed information on the health and safety hazards and precautions for use of this product, refer to the Material Safety Data Sheet.

DISCLAIMER

The information in this data sheet is given to the best of our knowledge based on laboratory testing and practical experience. However, as the product can be used under conditions beyond our control, we can only guarantee the quality of the product itself. We also reserve the right to
